

## ENVIRONMENTAL POLICY

At the Göteborg Opera, we are driven by passion and a desire to engage, we are committed, professional and innovative.

We strive for sustainability from both a social and ecological perspective, and employ working methods in which all resources are used intelligently and responsibly.

As a community figurehead with a focus on creativity, a modern world view, curiosity and

openness, we aim to take the utmost care in the way we conduct ourselves.

We try to actively contribute

to the creation of a society where diversity and responsible development lead to a positive life, now and for future generations.

The Göteborg Opera is the holder of an environmental certification for its business, meaning that

we comply with all applicable environmental legislation, we meet all of our clients' expectations

and we work systematically and strategically on all matters related to sustainability.

Every day.

Ronnie Hallgren, CEO
